## Pet Anal Glands

### How do I Clean My Pet's Anal Glands?

Dogs and cats have two small glands located **just inside the anal sphincter muscle** at the five and seven o'clock positions, just inside the anal opening. These small sacs contain a smelly pungent liquid that is unique to each individual dog. They use it to mark their territory and also to identify each other.

If you notice your cat or your dog **licking its anal area** more than usual or 'scooting' along the floor (pulling itself across the floor on its behind) your [pet's anal glands](#) may need to be cleaned or expressed.

These glands are normally the size of a kidney beans, however if they become impacted or full they tend to enlarge to the size of grapes. When your pet's stools aren't firm enough, they can't exert enough pressure to **empty the sacs and the fluid accumulates** – eventually becoming impacted.

### Steps to Clean the Anal Glands:

1. Cover the base of the tub in plastic refuse bags or an old towel
2. Position your pet inside the tub (empty of water) with its head to the left and anal area to the right (for right handed people).
3. With one hand hold your pet's tail firmly (at the base) and lift the tail out of the way. Gently hold a warm compress to the anal opening and surrounding areas for a minute or two.
4. Next, (while still holding the tail out of the way), with the other hand, wearing a latex glove dipped in warm water, insert the index finger gently just inside your pet's anal opening. (This is uncomfortable for your pet, so do this slowly and gently!)
5. Use the thumb of the same hand and place it on the outside of the anal opening at approximately 7 o'clock at which point you should feel the anal gland between your fingers.
6. Very gently pinch the anal gland between your fingers and the accumulated secretion should squirt out. You should be able to feel the anal sack shrink in size as you're gently squeezing.
7. Move your fingers to the 5 o'clock position and gently squeeze in the same way.
8. Once the glands have been expressed, wash out the black, brown, or gray

substance that comes out with shampoo in order to get rid of the unpleasant odor.

## Help for Cleaning Anal Glands

If you feel that this procedure is complicated, if the dog seems to be in a lot of pain, or if the **substance that comes out of the [dog's anal glands](#) is green or black** or contains blood, it could mean that there is an infection in the [anal glands](#). If this happens make sure to contact your veterinarian immediately.

### Natural Remedies

Luckily for pet owners, there are many natural herbs that have long been used to cleanse the animal body and assist with waste removal. Urtica urens is excellent for natural cleansing and soothing while Taraxacum officinale (Dandelion) is a well-known and **effective herbal cleanser helping** to detox your pets system and is perfect for use on the anal glands.

Matricaria recutita (German Chamomile) and Achillea millefolium (Yarrow) will help to **support the health of the skin** around the [anal glands](#) and help speed healing. In addition, Silica is a natural remedy excellent for supporting natural emptying of the anal sacs, also helping to keep the anal ducts open.

### Tips for anal gland health

- **Feed more fiber.** If you're feeding your dog homemade food, give him/her an additional half to one serving of vegetables. This will help to 'bulk up' stools. This will mean more pressure to empty the sacs.
- **Improve quality.** If you are feeding low-quality dog food, try introducing dog food that has two meat sources in the top 3 ingredients listed (indicates larger quantities contained in the food).
- **Exercise.** Walking helps "things" move in the right direction and strengthens the rectal and abdominal muscles!
- **Repeat the procedure** (outlined above), regularly during bath time to keep your [dog's anal glands](#) in optimal health – or take them to the vet now and then to have the anal sacs expressed.

## The Natural Approach

While Western medicine has become the norm in many cultures, it is not the only treatment option. Conventional western medicine, often called allopathic medicine, is the system of medicine taught at most medical schools and most pharmaceutical and synthetic medicines are manufactured and marketed according to the principles of allopathic medicine. Allopathic medicine is also sometimes called orthodox medicine.

Because most of us in the Western world have grown up in a society in which allopathic medicine is the prevailing norm, we forget that, only a few decades ago, homeopathic, herbal and other natural medicines were commonly available – and freely used even by conventional doctors and veterinarians. While there are often heated debates about which system of medicine is 'better' than the other, many responsible doctors and vets (whether they are allopathic or not) recognize that

both have a role to play in the treatment program.

Just like humans, domesticated animals like dogs and cats are affected by the health hazards of modern living. Pollution, poor nutrition, stress and unhealthy lifestyles can lead to a variety of illnesses and conditions that are very similar to those experienced by humans. In fact, many, if not most pet health concerns can be addressed by helping your pets to live a healthier lifestyle. While it has its place, conventional medicine for animals and 'modern technology' have failed our pets in many ways.

According to pet expert and author CJ Puotinen, most holistic veterinarians and animal health care professions list annual vaccinations and commercial pet foods as the major contributory cause in the rising rates of chronic illness in pets today. Similarly, Juliette de Bairacli Levy, respected author and renowned animal breeder, points out that contrary to the belief that mass vaccination and antibiotic use will contribute to a decrease in disease, the opposite has in fact proved true. Like their human counterparts, today's pets are becoming more and more vulnerable to chronic disease and ill health. This has led many veterinarians to search for alternatives and to espouse more holistic methods of keeping our pets healthy.

"In the wild, animals instinctively seek out healing herbs to help them when they are ill or undernourished. In fact, Asclepius, the ancient Greek god of medicine, respected dogs very highly for their ability to seek out and eat medicinal herbs in the wild. This ability is shared by other animals, including cats. We are coming to realize that nature often has the answers - but animals have always known this! Natural medicine can help your pet just as it can help you. While there is always a place for conventional veterinary medicine, natural medicine can compliment conventional veterinary care and in many cases do just as well. I have applied the same care and research that have gone into our Native Remedies range for adults and children to the development of pet-friendly, safe and effective natural remedies for animals. As always, all remedies are formulated to the highest therapeutic standards and manufactured under strict pharmaceutical conditions for your peace of mind and the well being of your pets. " Michele Carelse, Clinical Psychologist.

"When a veterinary surgeon practices the use of homeopathic medicine and is asked why he does so, he may give one of several answers. The simple answer would be that the results are good, an emphatic answer would be that homeopathic treatment has no unpleasant or dangerous side effects, while still achieving successful results.

The [PetAlive Homeopathic range](#) has been formulated with this knowledge and is specifically designed to treat your pet in a holistic and natural manner."

Common Questions Asked About Holistic Health Distance Learning Courses:

What is Certification?

Most schools will offer an exam that tests the student's knowledge of the material taught in the respective course. Upon successful completion of this exam, a Certificate or Diploma will be issued by the school attesting that the student has successfully met the requirements as specified by that school. The only governmental recognition of Aromatherapy in North America is the occupational title designation granted to the BCAA under the Societies Act of British Columbia.

What is a Certified Aromatherapist or Reflexologist?

Most prospective students want to know whether taking our courses will lead to their becoming 'Certified' in that healing modality, thereby leading to the title of Certified Aromatherapist, Certified Reflexologist or Certified Color/Crystal Therapist. The answer to this really depends on what you mean by 'Certified.' We believe it can be misleading to purport that completing a course in a healing modality such as reflexology, aromatherapy or color/crystal therapy will lead to a designation of 'Certified' Therapist. These are not official

title designations nor are they ones which are recognized by any country's governmental body. All that these titles mean is that this is what an Individual Instructor, School or Institution decided to put on the Diploma it awards those who successfully complete their course.

What is an accredited course in Aromatherapy or Reflexology?

The answer to this will depend on who you are asking. At the present time, British Columbia is the only government to recognize Aromatherapy as a distinct profession and has granted Occupational Title Protection to the members of the BCAA (British Columbia Alliance of Aromatherapy) with the exclusive right for its members to call themselves Registered Aromatherapists (R.A.).

At this time, neither Reflexology nor Color/Crystal Therapy have such occupational designations in any country although one prominent Reflexology school in Colorado, The Modern Institute of Reflexology, has gained occupational designation for their institution in that state. MIR has been designated by the Colorado State Division of Private Occupational Schools - Dept. of Higher Education as an approved school. Our Reflexologist who developed the reflexology modules for our courses was trained at MIR as a Certified Reflexologist, a Master Reflexologist and a Dr. of Reflexology.

In the United States, the NAHA (National Association for Holistic Aromatherapy) has put into place their Approved Standards for Aromatherapy Training. The Alternative Healing Academy's Advanced Aromatherapy course meets and exceeds these standards and we are in the application process of becoming an approved program through the NAHA.

In Canada, there are a number of different Associations including the BCAPA (British Columbia Association of Practicing Aromatherapists) and the CFA (Canadian Federation of Aromatherapists). Time will tell if one authoritative body or association becomes the standard by which to judge and govern the educational offerings of these alternative healing modalities.

It has to be noted that NO form of aromatherapy "certification" is currently recognized in the USA by anyone other than those in the trade, nor is aromatherapy (or essential oils in the aromatherapy trade) regulated by any governmental body.

Some information about the courses we offer:
